

Mechanics - Inspection Checklist

Monthly Checks

- Full alignment inspection with the alignment tool and proper measurements. ☐
- Check all wire connections. ☐
- Check that all wire connections are receiving 12 Volts:
 - Solenoid valve ☐
 - Control Box
 - Sensor
- Visually inspect the sensors to ensure there are no cracks in the plastic. ☐
- Ensure the junction box is well sealed with no water getting inside. ☐
- Check the harness to ensure no rodents have chewed through it. ☐
